Before Infinity Dental Web took over my website, there was nothing coming in. My website now gets me great cosmetic patients who are well informed and ready to spend money. They love the design of the website, the content, and the smile gallery. And I get great customer service—I can't say enough about what Infinity Dental Web does for me.

I've been with Infinity Dental Web for six years now. My website simply wasn't attracting new patients until they started helping us. Now it's our number one referral source. And even after six years, our traffic keeps increasing. They started doing social media for us over a year ago and since then our traffic has doubled again.

My website was old and tired looking. Infinity Dental Web created an up-to-date, beautiful and unique website for my practice. I love the way Infinity stays current with the ever changing world of web search criteria and consistently places my website to have high traffic. Infinity has been the best web design and Internet marketing company I have worked with in my dental career.
